DETAILED ACTION

1. This Office action is in response to the application filed by Stefan Prebeck et al. on 5/11/07 for the invention titled "METHOD FOR THE OPERATION OF A TRAVELING POWER TAKE-OFF SHAFT COUPLED TO A DRIVING MOTOR".

Claims 6-11 are presently pending.

Drawings

2. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81(c). No new matter may be introduced in the required drawing. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicant's independent claim 6, lines 5-7 recite "upon attainment of one of a higher and a lower threshold value of the drive motor, shifting will occur to a next higher, i.e., next lower, power takeoff stage". First of all, the use of "i.e." in claim language, and especially in

Art Unit: 3663

this particular context, is indefinite and also confusing, because Applicant does not clearly and distinctly recite which of the higher or lower power takeoff stages the higher and lower drive motor thresholds are to be associated with. Furthermore, there may not be proper antecedent basis for "the next lower, power takeoff stage".

Similarly, Applicant's independent claim 10 recites: shifting to a next lower power take off (previously in the claim spelled takeoff) stage when one of a higher and lower threshold value of the drive motor is achieved, whereas, therefrom, it would appear that in either case the use of a "next lower power takeoff stage" is adopted.

Dependent claims 7-9 and 11 are included in this rejection because they depend from an indefinite base claim, and are therefore also considered to be indefinite.
